SAFETY INFORMATION BULLETIN 03/2021

Attn: State of Kuwait AOC/POC Holders, Maintenance Organisations, Ground Handlers, Air Navigation Services and Kuwait Airport Operators

Subj.: Restart of Normal Operations

This Safety Bulletin provides recommendation to the Kuwait Air Operator Certificate holders, Private Operator Certificate holders, Aerodrome Certificate holders, Air Navigation Services and Ground Handling Organizations to draw your attention to the gradual restarting of normal operations required extra safety measures to be put in place.

The Aviation Safety Department strongly recommends that each entity should start its Risk Assessment Committee or Team or Workshop in their relevant areas of operation to identify any hazards that could develop into a potential risk during the restart of operations.

The hazard identification should cover all areas including but not limited to, Flight Operations, Aircraft Maintenance, Training, Ground Handling, Air Navigation and Airport Operations.

The Committee/Team/Workshop should then develop a mitigation plan for the identified hazards, continue to monitor and reassess during the restart of operations, and modify the plan to ensure a safe restart of the Civil Aviation Operation in the State of Kuwait.

The Kuwait DGCA highly appreciates your continuous cooperation to maintain a high level of Civil Aviation Safety.

Abdullah Ali Al-Mudhaffar
President of Civil Aviation
